

# Azure Container Foundation

Your AI apps and workloads on ACA or AKS, standardized, managed and production-ready in weeks.

Five teams, five clusters, five different approaches – and no one knows how the other built their environment. Azure Container Foundation puts an end to the sprawl. One platform, 100% Azure-native, fully deployed via Infrastructure as Code, and production-ready in 3 to 4 weeks.

## Benefits at a Glance

### AKS or Container Apps

Depending on your workloads, we recommend the right service – with Container Apps as our first choice for most scenarios.

### Production-Ready in 3–4 Weeks

Structured onboarding instead of months of setup – you deploy quickly, we take care of the foundation.

### 100% Infrastructure as Code

All clusters and environments are built fully automated – reproducible, version-controlled, no manual configuration.

### Security & Compliance by Default

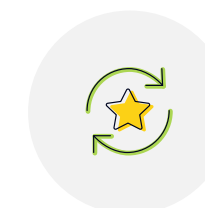

Network policies, RBAC and monitoring are integrated from the start – not bolted on as an afterthought.

### Managed Service

No fire-and-forget: we handle operations so your developers can stay focused on building their applications.
